grow

GROWTH CAPITAL INITIATIVE WITH THE
GROW BLOCKCHAIN

Ladies and gentlemen, I present one of the most groundbreaking opportunities in today's economic landscape: Grow Blockchain, the world's largest node-governed decentralised network built exclusively to power the future of agriculture and food. This is more than a platform; it is a pathway to shape, own, and participate in the infrastructure driving transparency, resilience, and regenerative growth across global food systems.

This isn't theory. It's already in motion:

• **9000+ community members** across 10 countries.

• **34,264 wallets** and counting.

• **826,708 blocks** secured.

• **4,000 transactions daily.**

• **29,000 operational Nodes in just 15 months,** with a lifetime allocation of 100,000.

• **Nodes launched at** $**2,000**USD**, now valued at** $**6,500**USD**.**

• The newly released **Lite Node** - pegged to 1/100th of mined tokens ($**600**USD value) - went live in July 2025.

And this isn't just a blockchain. It's a **platform for an entire agricultural economy,** bringing the $**2.7 trillion global agricultural market on-chain.**

WHY THIS MATTERS

• **Transparency & Trust:**
  Every actor in the supply chain transacts
  using the same verified data, levelling the playing field.

• **Fraud & Waste Reduction:**
  Real-time visibility eliminates blind spots and exposes
  inefficiencies.

• **Efficiency Gains:**
  Integrated, transparent marketplaces can deliver up to 40%
  savings in time and capital across the chain.

We're not talking about
Potential.

We're talking about
traction.

Ecosystem dApps Driving Real-World Impact

01 🌱 FarmTracer

- Tracked ~90,000 cattle over six years.
- Processes ~45,000 lbs of meat daily (~98.5 million lbs to date).
- Expanding to apples, cherries, bee hives, and crop tracing starting fall 2025.

03 Kohima

- **11 active impact projects,** with 3 in the pipeline.
- **120,000 acres under regeneration** across 4 countries.
- Project scale ranges from **8 acres to 50,000 acres,** proving we can operate at any level.

02 EcoMint

- **$2 million in methane avoidance credits** issued to Nestlé.
- **72,000+ carbon offset credits** generated for agroforestry project in Peru.

04 Nourish MARKETPLACE

- **20 vendors active in 4 countries,** doubling to 40 by Summer 2025.
- Multi-sector: Food & Beverage, Health & Wellness, and Services.
- Supports both **B2C and B2B transactions.**

NFT Layer - Unlocking Digital Agriculture Assets

- **Grow Manifesto NFT** $10 USD
- **Land NFT** $10 USD per acre
- **Blockchain Cow NFT** 250 USD dollars

- **Animal NFT** -$500 USD
- **NFT Boost** -$600 USD
- **Cultivator Series:** Seed, Sprout, Sower, Steward Levels and Rewards based on action

These aren't gimmicks; they're programmable assets tied to real-world agricultural value streams.

Funding Opportunity

We are seeking $**1.5 million** in capital to:

- Expand **Farm Tracer** as the backbone of global agricultural traceability.
- Scale **marketing and adoption** to capture global market share.
- Build out the **infrastructure** required to support exponential growth.

Independent Validation

Don't take our word for it:

- World Bank - Exploring Blockchain in Agriculture
- McKinsey - Tokenization: A Digital Asset Déjà Vu
- FAO - Blockchain for Agriculture

Grow Blockchain isn't just building tech. It's laying the foundation for the next era of agriculture:
Transparent, Traceable, Decentralised, and Profitable.

We've proven the model. Now, we're opening the door for capital partners who understand one thing:
The future of food is on-chain.
